

Code Enforcement

FundView Code Enforcement provides comprehensive case management for code violations including inspections, notifications and administration.

FundView Code Enforcement is a web-based code enforcement solution that manages all phases of the code enforcement process. Customizable violation types with user-defined inspection and notification templates.

FEATURES & BENEFITS

- Create cases with template-driven inspection/notification procedures
- Log all communications/correspondence with violator; task console for easy scheduling
- Track liens on cases that involve enforcement costs
- Share common property/contact master files with all land based FAST solutions & GIS
- Integrated document processing for letters, notifications and certificates
- Attach unlimited inspection images, documents and notes to support case history
- Mobile inspection capabilities using web-enabled smart device
