

Mobile Meter Reading

FundView Mobile Meter Reading allows employees to conveniently input readings for metered services such as water, gas, and electricity from a web-enabled smart device. Mobile Meter Reading is fully integrated with FundView's Utility Billing and Service Order solutions to help streamline operations, and eliminate paper driven manual processes.

FEATURES & BENEFITS

- Real time input of meter readings captured in the field
- Input reads based on reading sequence defined at the account level in FundView's Utility Billing solution
- Create Service Orders in the field during reading input
- Validate reading input based on expected usage defined at system level
- Dashboard displaying routes, number of meters, unread meters, and percentage of meters read
