Secure Signatures

Secure Signatures

Enhance Control & Compliance with Secure, Integrated Digital Signatures

FundView's Secure Signatures module offers a powerful, cloud-based solution that streamlines the approval and authorization process for Accounts Payable, Payroll and Municipal Court. Designed specifically for local governments, Secure Signatures integrates seamlessly across FundView's platform to ensure security, efficiency, and visibility in every signature workflow.

Accounts Payable:

Secure Signatures enables secure digital approvals for check printing. Designated signees can review payment batches, view associated invoice images, and approve payables with a single click. Approvals automatically apply a secure digital signature to the check.

Payroll:

Payroll checks and direct deposits on Secure Signatures brings the ease and convenience of remote approval and signing of employee pay by multiple signers, and removes the sticky pain point of waiting for those approvals before distributing time sensitive payments.

Municipal Court:

Judicial document signatures are captured, tracked, and stored digitally through FundView's Municipal Court Solution. Judges can review and sign warrants, plea agreements, and payment plans using a centralized web-based console, reducing paper and speeding up processing.

Key Features:

- ▲ Password-Protected Security – Digital signatures are protected with individual password authentication, ensuring only authorized users can approve and sign.
- ▲ Custom Signature Rules – Configure the number of required signatures and assign signature types based on department, and/or role.
- ▲ Full Integration – Seamlessly integrates with FundView modules including Accounts Payable, Payroll, and Municipal Court to unify signature workflows across financial and judicial functions.

Signature Tracking & Audit Trail:

FundView provides a transparent, fully auditable record of all digital signatures and approvals, helping municipalities meet internal control policies and compliance standards with ease.
